The safety gate Open'n Stop offers child-friendly safety at home and is suitable for widths from 75 to 80 cm. If you wish to secure larger openings, we recommend our Open'n Stop inclusive 9cm extension (84 - 89 cm) or rather our Open'n Stop inclusive 21cm extension (96 - 101 cm). Each model of this gate can be extended with a maximum of two extension extension and up to a maximum width of 122 cm. With Y-spindles, the gate can also be used for round stair railings.

The attachment is done in the twinkling of an eye. The metal gate is clamped by pressure mounting between walls or doorways. Drilling and screwing is not necessary.

The Open'n Stop Safety Gate has a two-fold manual locking mechanism. It can be opened with one hand and locks reliably in a childproof closure.

With separately available extensions, the gate can be individually extended and used as a stair gate. If you have a stair railing with round bars, you can attach the safety gate next to the extensions of 9 and 21 cm with the separately available Y-spindles.

The following dimensions and combinations are possible:

75 - 80 cm = safety gate without extensions  
84 - 89 cm = gate + 9 cm extension (separate)  
93 - 98 cm = gate 9 cm extension (separate) + 9 cm extension (separate)  
96 - 101 cm = gate + 21 cm extension (separate)  
105 - 110 cm = gate + 9 cm extension (separate) + 21 cm extension (separate)  
117 - 122 cm = gate + 21 cm extension (separate) + 21 cm extension (separate)

If you use the hauck Y-spindles in combination with the 9 cm and 21 cm extensions, the same options are possible.

**\*Note:**

This product is a self-adjusting gate. This means that the gate's initial misaligning/gap on the level of the locking mechanism is eliminated by tightening the locking screws in the frame.
