**COMPATIBLE WITH CURRENT HAUCK SAFETY
GATES**

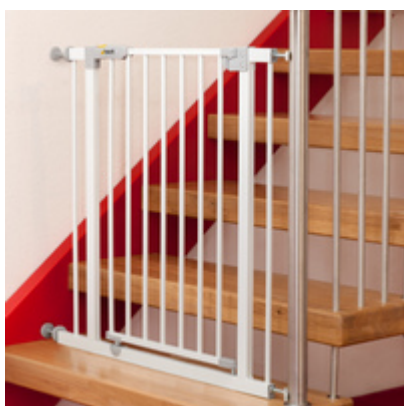

SIMPLY WELL ATTACHED

Does your stair rail have round bars? Easily attach your hauck safety gate to your stairs with y-spindle adapters. Also for oval bars, up to 10 cm in diameter.

NO DRILLING REQUIRED

Don't want to drill any holes into the wall? Y-spindles are perfect for you! They can easily be fitted onto the stair gate instead of the adjusting screws. No need for a drill.

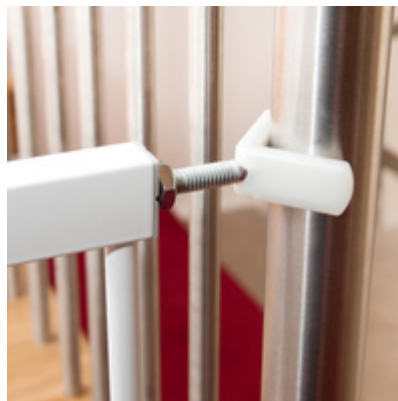

COMPATIBLE WITH CURRENT HAUCK SAFETY GATES

Fits your stair safety gate: the y-spindle adapters are compatible with current hauck safety gates, such as the Clear Step Autoclose 2, Clear Step 2 and Open N Stop 2.

EASY ASSEMBLY AND REMOVAL WITHOUT A TRACE

With y-spindles, your stair gate stays in place with pressure alone. Simply clamp the safety gate into place. And take it out again just as easily. No marks are left behind.

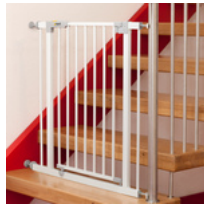

ALSO FOR WIDE STAIRCASES

Is the 11 cm thread of the Y-Spindle adapter not enough for securing your stair gate? Then simply make the gate wider using hauck's extensions. Either 9 cm or 21 cm wider.

Y-ADAPTERS FOR HAUCK STAIR GATES

Product Images

Thanks to these Y-spindels you can install almost all hauck safety gates on stair railings with round or oval bars with a diameter up to 3.9 in.

The Y-spindles are 4.3 in long and available in packs of two (for one side of the gate).

These adapters are compatible with the following hauck safety gates for children: Autoclose N Stop 2, Clear Step Autoclose 2, Open N Stop and Open N Stop KD.

You can also use the Y-spindles for door gates that have already been individually extended with one or two extensions of 3.5 in and/or 8.2 in.
