# STOP N SAFE 2 INCL. 21CM EXTENSION

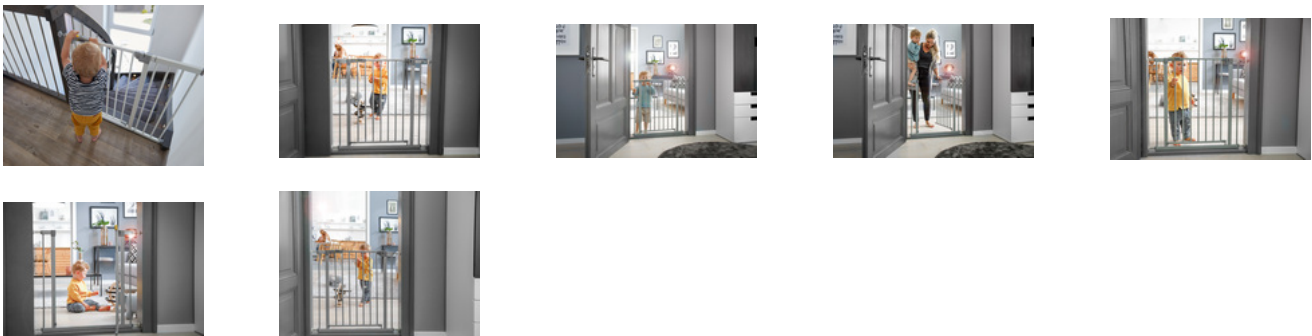

FOR WIDTHS 96-101 CM

The safety gate Stop N Safe 2 comes with a 21cm extension and can be used to childproof openings of 96 to 101 cm. If you want to secure smaller openings (84 - 89 cm), we recommend the Stop N Safe 2 that comes with a 9cm extension and for standard openings (75 - 80 cm) the Stop N Safe 2 without any extension. Each gate can be combined with a maximum of two extensions, one on each side. For round stair railings, we recommend our Y-spindle.

The metal safety gate is installed with four fixing screws by pressure in between stairs, walls or doors and leaves no trace when removed. Adults can open the 50 cm wide door with one hand only in both directions. This way, one hand remains free for the little explorer. The door's two-fold manual locking mechanism can't be opened by small children.

With an additional 9 cm or 21 cm extension (sold separately), the Stop N Safe 2 gate can be extended up to 122 cm. If the gate is to be installed on round stair railings, we recommend the hauck Y-Spindles as accessories. These replace the fixing screws on the safety gate's side that needs to be fixed on round railings.

The following opening widths are possible:

- 75 - 80 cm = safety gate (without extensions)
- 96 - 101 cm = safety gate + 21 cm extension (included)
- 105 - 110 cm = safety gate + 21 cm extension (included) + 9 cm extension (optional)
- 117 - 122 cm = safety gate + 21 cm extension (included) + 21 cm extension (optional)

Please note:

This item is a self-adjusting gate. This means that the initial inclination of the side part is eliminated by tightening the locking screws in the frame. This way, a secure hold and a parallel fixation of the side parts is possible.
