USABLE FOR MANY
GLASSES & BOTTLES

FEED ME
MEASUREMENTS

This compact bottle warmer is made of durable neoprene and features a unique heating element. The shape adapts to any bottle. Thus, the contents are heated quickly and evenly. The Feed Me fits any car cup holder due to its small size or can be attached to the dashboard by its hanger. The 12-volt link-up has a power indicator and an integrated overheat protection. The food is heated up to 50% faster than in conventional bottle warmers. Connect to any 12-volt cigarette lighter.
