

ECO RIDER

ROOT 1

ECO RIDER

Product Images

The Eco Rider by hauck is a lightweight balance bike for beginners, suitable for children from 2 years onwards. There is deliberately no handbrake to facilitate handling for beginners. The children can concentrate entirely on the complex processes for their age. Early learning of balance, steering, drive and braking movements with arms and legs is an optimal preparation for later cycling and trains correct behaviour in road traffic. Saddle and handlebar are height adjustable. With the Eco Rider, the little ones feel very big, and every excursion is much more fun. Playful learning with hauck!

### Features:

- Sturdy steel tube frame
- 10" EVA wheels Ø 23.5 cm
- Height-adjustable seat: 33.5 – 38 cm
- Height-adjustable handlebar: 50.5 – 53 cm
