TRAINING MOTOR SKILLS BY ROWING

STABLE FRAME
IN LONG-LASTING QUALITY

STABLE FRAME IN LONG-LASTING QUALITY

Thanks to its stable frame, the Twist-it can be used up to 110 lb, making it suitable for every driving fun. The cruiser is suitable from 4 years onward and is steered by the child's arm movements.

ANTI-SLIP HANDLES AND FOOTRESTS

The handles are made of high-quality plastic, offering your child a safe grip while driving. The rubberized footrests provide additional support and comfort during the ride.

IN WHISPER MODE

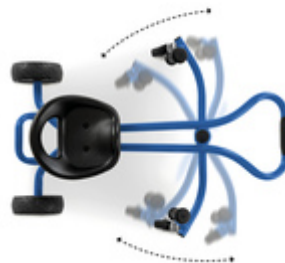

SLALOM DRIVE IN WHISPER MODE

The two front wheels have a 360-degree range of movement, making the Twist-it particularly agile. Driving noise is muffled by the two comfort wheels.

ROWING MOVEMENTS WITH LEARNING EFFECT

The Twist-it is driven and controlled by rowing movements at the same time, training your kid's agility, motor skills, strength, and stamina in equal measure.

The hauck fun cruiser from kindergarten age Twist-it

The Twist-it ride on allows your child from 4 years onward to train coordination, motor skills and agility, while drifting around with friends.

The agile fun cruiser is steered by the rowing movements of the arms, providing a unique form of locomotion which supports the development of strength and stamina at the same time.

Thanks to the 360-degree range of movement, manoeuvring the Twist-it is child's play.

Smooth-running comfort wheels muffle the noises while driving and guarantee fun even on uneven ground.

The four-way adjustable seat ensures maximum seating comfort, growing with the child and promising years of whizzing around the house and garden.

Sturdy grips on the handlebars and rubberized footrests prevent little racers from slipping off while riding at high speeds.

The Twist-it carries a load of up to 110 lb and is the cool fun cruiser for active children and impresses with its unusual design and functionality.
