hauck

ROOT 1

Product Images

The Eco Light from hauck is a versatile transport vehicle. The construction of solid steel tubing, profiled plastic bottom, and durable quality fabric allows a maximum capacity of 50 kg, for transporting of one child. A seat cushion with backrest is included for snuggling into. With its low centre of gravity, the Eco Light is tilt-proof and equally suitable for transport of luggage, beach gear, or shopping purchases. The tow bar is hydraulically sprung and thus prevents the risk of tripping when not in use. For transport in small trunks, the tow bar is removed and the tub folded flat by releasing the side clamps.

Features

- Rugged tubular steel frame
- Stable plastic bottom
- · Low centre of gravity
- Front wheels: 5.5" swivel wheels with EVA foam tires, Ø 13.5 cm
